FAST RESPONSE MOUTHPIECE

Instrument

BBb and CC-Tuba

Cup Style

33.00 mm, medium depth and funnel shaped

Rim Width

7.50 mm, medium sharp inner, rounded outer edge

Throat Bore

8.30 mm

Resistance

Moderate

Shank

Large or Amercian

Model PT-36 is a proven and widely accepted general purpose mouthpiece.

The cup diameter to volume relationship is unique. The depth is necessary for good tone quality and solid resonance. Response is good and sound clear with obvious center. Narrow rim provides remarkable flexibility.

The PT-36 is ideal for large-bore instruments when fast response is desired.

VIRTUOSO SOLO AND ENSEMBLE MOUTHPIECE

Instrument

F- & Eb-Tuba

Cup Style

32.00 mm, shallow, bowl-shaped

Rim Width

8.00 mm, slightly rounded

Throat Bore

7.80 mm

Resistance

Moderate

Shank

Large or American

The PT-64 is likely the most widely used and successful modern F-tuba mouthpiece.

It has benefited from constant refinement and adaptation to the requirements of modern artists and their repertoire. It makes a lively and exciting sound with clear core possible. True Sound Energy, character and clarity for virtuoso solo and orchestral performance. Also recommended as a solo mouthpiece for Eb-tubas.

Model PT-65 / 65S

SOLO, ENSEMBLE AND ORCHESTRAL MOUTHPIECE

Instrument

F- & Eb-Tuba

Cup Style

32.00 mm, shallow, bowl-shaped

Rim Width

8.50 mm, semi-cushion with rounded inner edge

Throat Bore

7.80 mm

Resistance

Moderately strong

Shank

Large or American

The PT-65 utilizes a cup which is similar to that of the PT-64. The rim is semi-cushioned with a rounded inner edge. Throat and shank bores are calibrated for a dark tonal quality, strong core and excellent low register response. Due to the weight of the rim and body mass of the shell relative to cup volume, this is essentially a heavy-shell mouthpiece. **Also works well as an Eb-tuba solo or brass chamber music mouthpiece.**

PERFECTION IN A MEDIUM-LARGE CONFIGURATION

Instrument	BBb and CC-Tuba
Cup Style	32.00 mm, medium depth with funnel shape
Rim Width	7.50 mm, moderately rounded with sharp inner edge
Throat Bore	8.60 mm
Resistance	Moderate
Shank	Large or Amercian

Model PT-83 offers comfortable resistance and ease of tone production. The narrow rim provides quick response. The tapered cup provides substantial volume enhanced by a rather large throat bore with the shank bore matched for resonance and efficiency. An ideal mouthpiece for CC and BBb tubas, works particularly well on medium-bore instruments and not only for young players but also for those who use large instruments.

CANADIAN BRASS® Arnold Jacobs Heritage Model CBAJ & CBAJ L

Instrument	BBb and CC-Tuba
Cup Style	32.70 mm, pear shaped cup
Rim Width	7.00 mm, narrow with clearly defined edge
Throat Bore	8.50 mm, large throat
Resistance	Open-blowing
Shank	Large or American

The Arnold Jacobs Heritage Model mouthpiece is surely the most sophisticated tuba mouthpiece ever.

It is elegant in design, live and responsive in function. The core of the sound is clearly defined yet strong and dark in character. Response is even and flows over a broad compass, the low register is highly efficient and the high range has great stability.

Cup Style	33.00 mm, deep pear shaped cup
Rim Width	7.50 mm, narrow with clearly defined edge
Throat Bore	8.30 mm, open backbore
Resistance	Open-blowing
Shank	Large or American

Engineered to provide substantial volume and depth of tone, particularly on lower middle register notes which can be critical on some instruments. The throat is optimized for comfortable resistance, contributing to fast response, broad core in the sound and enhanced playability in the high register.

MB-50 offers a unique combination of desirable qualities with remarkable depth of tone in the low register.

Instrument	F-Tuba
Cup Style	32.00 mm, moderate depth. rounded cup
Rim Width	8.00 mm, narrow with clearly defined edge
Throat Bore	7.80 mm, elongated throat
Resistance	Moderate
Shank	American

Collectors of Chicago Symphony Orchestra recordings know that Arnold Jacobs' sound on the F-Tuba had the same richness, depth of tone and character as with the CC-Tuba. The MB-64 is a particularly elegant F-Tuba mouthpiece. Ideal for solo and chamber music as well as orchestral performance. Particular attention has been given to tonal flexibility, lyricism is easily achieved and response is secure in all registers.

Cup Style	32.00 mm, elongated moderate pear shape
Rim Width	7.50 mm, narrow rim, fairly sharp inner edge
Throat Bore	8.60 mm, short backbore
Resistance	open-blowing
Shank	American

This mouthpiece is similar to the Arnold Jacobs Heritage Model yet based on smaller cup diameter. It has smooth and flowing response characteristics, is highly efficient so that excellent results can be obtained with normal air quantity. The sound is rich, almost horn-like, flexibility and response are in good balance.

MB-83 is recommended for musicians who prefer a moderately wide mouthpiece with a melodic dark sound.
